## WESTERN ZODIAC ANALYSIS

On the day you were born, October 14, 1980 at 13:25 in Wilmington, NC, the Sun was in Libra and the moon was in Sagittarius. You're diplomatic, intellectual and someone who appreciates beauty and harmony. You project as a calm, level-headed and person who values fairness and justice. On the inside however, you are fiery and crave adventure and excitement. You love to learn about new things, travel and experience different cultures, philosophies and places. You're also on a continuous pursuit of spiritual growth as Jupiter, the planet of wisdom and expansion governs your inner Sagittarian nature. With an Ascendant in Capricorn, you are ambitious and driven to succeed. You also wish to be respected as an authority. Because of Capricorn's high standards, you should only choose a life partner who can keep up with the image you value and that you wish to present to the world.

## PLANETARY ALIGNMENTS

**MERCURY in Scorpio:** Your style of communication is direct and firm. You don't mince your words and speak right to the point. This is because your emotions and feelings dictate exactly how and what you wish to say. This makes you brutally honest for better or worse. People value what you have to say because of your honesty but you may sometimes hurt their feelings by giving them too much truth. You're deeply inquisitive and interested in getting to the bottom of any mystery or problem.

**VENUS in Virgo:** Your love language is one of practicality and efficiency. You appreciate a romantic partner who is financially secure, disciplined and grounded. You also like to be in service to your friends and loved ones. Just be careful not to put too many needs before your own. There is a tendency to sacrifice yourself for others. You may also have a perfectionist element and expect a lot from others.

**MARS in Sagittarius:** Your desire for freedom is very strong. You do not take well to being controlled or receiving ultimatums. You're an idealist with a love for travel and spiritual expansion. You're on a quest to learn and experience as much as you can on this planet. Once you have your mind set, it's very hard for anyone to change that. You also have an abundance of energy.

**JUPITER in Virgo:** You're willing to work hard to manifest your dreams and make them a reality. Jupiter, the planet of luck finds its fortune and success through diligent work and/or being of service to others in Virgo. This may be through teaching or taking part in philanthropic endeavors. The importance of continuing to expand your knowledge through study and learning will be a lifelong pursuit. Just be weary of a tendency to be overly critical of others.

**SATURN in Libra:** You feel a sense of responsibility for maintaining balance in all your relationships. You are diplomatic and need to intellectually evaluate all sides of a subject or argument before making up your mind. When making plans, you consider every angle and possible outcome before making a decision. This gives you an element of practicality and grounding.

**URANUS in Scorpio:** This placement marks those born between 1975-1981. You are fascinated by the mystical arts and the unknown. You are also intrigued by anything that's curious or has an investigative element. These individuals maintain an aura of secrecy and may work tirelessly in privacy on their plans for success.

## PLANETARY ALIGNMENTS (CON'T)

**NEPTUNE in Sagittarius:** This placement marks those born between 1970 and 1984. These individuals are dreamers and idealists. They have a deep need and desire to spiritually evolve. These Gen X'ers and early Millennials were born dreaming and making plans for a better world. They also value freedom and a more tolerant society. When it comes to relationships, careers and materialism, they're on a search for something with more meaning.

**PLUTO in Libra:** (This is a broad reading for those born between 1971-1984). This generation is diplomatic and seeks harmony in their relationships. They have the gift of compromise and can usually find a middle ground in the event of arguments. They can sometimes however become paralyzed with immobility from indecisiveness.

**CHIRON in Taurus:** The wound of Chiron you need to heal in this incarnation surrounds your financial stability and materialism. On a pursuit of striving for security, you may feel like you "never have enough". This can lead to less desirable actions like indulgence in food, drink or acquiring material goods which perpetuate a cycle of financial instability and unhealthiness. The healing comes through investing in yourself and recognizing that YOU are in fact the prized possession. Through a focus on financial planning and honest self-care you can overcome this Chiron lesson and turn it into an asset. Becoming grounded and practical will give you a sense of accomplishment.

**TRUE NODE in Leo:** Your life purpose is to let yourself shine in front of crowd and be courageous. You are meant to be a leader and/or an entertainer. Your destiny is to manifest self-expression and creativity. In your past life, you were an Aquarius, focused on the needs of the collective and society. You spent much of your time concerned about the betterment of the world and put your own needs on the backburner. In this life, you are meant to take center stage and lead by example.

## MOON ANALYSIS

You were born when the moon was in its Waxing Crescent phase. This is the "Innovator's Moon". This moon is all about creativity and learning. You are adventurous and naturally curious about life. It's the beginning phase of the moon that transitions from dark to the first silvery light. This is all about breakthroughs, creativity, bursts of inspiration and art. You have the ability to take an idea and turn it into reality. Those born in this phase are unusually quick to learn new things.

## CHINESE ZODIAC ANALYSIS

**METAL MONKEY:** The monkey is strong-willed and determined to succeed at whatever they choose to do. They are eager to learn and learning comes rather easily for them. Monkeys are intelligent, resourceful, energetic and popular. They're very and love networking with people. They're quick-witted but this can also rub others the wrong way as they may be considered too pushy and overbearing. Sometimes you can be impatient and stubborn. Monkeys like to be the center of attention and it's easy for them to stand out in a crowd. In 1980 monkeys, the element of Metal is associated with the lungs and large intestine and the emotion of grief. There may be a tendency to hold on to old memories or have a difficult time letting things go. This may manifest as issues with the digestive tract or through minor colds. Generally, monkeys maintain good health as long as they pay attention to their diets. Another thing to be mindful of is moving with intention. Sometimes monkeys move so fast they can be prone to accidents.

This is something they must learn to use and channel for their spiritual growth. Their minds are ripe with innovative thoughts and they like to spread the seeds of consciousness. According to the Mayans, a "Seed" is destined to be wealthy and wise. Another name for "Seed" is "The Net". Many people, objects and opportunities flow to them and they wind up with an abundance of materials and options just like catching fish in a net. As such, the Seed is associated with abundance. However, the pitfall could be amassing a set of traps. Acquiring too much can become overwhelming. Sometimes less is more. As a "Net" or "Seed", you are very social and a natural networker. You must learn to balance your sexual energy.

# HUMAN DESIGN

## HUMAN DESIGN (CON'T)

**TYPE: GENERATOR:** Generators comprise 70% of the population and are the only Human Design type capable of generating and sustaining life force energy. Pure Generators are the builders of the planet. The primary characteristic is defined by the Sacral center which is the center of life force and work capacity. Generators have the stamina and energy to build, create and work to keep the world running. They are designed to know what works is satisfying for them and they have the energy to master what they love doing. When you are not doing what you love you will be frustrated. If you are doing what you love, you are an unstoppable force. You have a magnetic and open aura that draws life toward you. Your strategy is to wait for life to come to you and respond rather than initiate. This means waiting for something in the outer reality to respond to before making decisions that impact your life. Responding can come in various forms – it can be a gut response, a bodily sensation or a sense of knowing. Some famous Generators include Albert Einstein, Oprah Winfrey, Beyonce, Walt Disney, Robin Williams, Gwyneth Paltrow and the Dalai Lama.

**SACRAL AUTHORITY:** When making a decision, you need to listen to your gut. Is it a “yes” or a “no”? If it’s not 100% yes, it’s a no. You operate through gut instinct.

**1/3 PROFILE “THE INVESTIGATING MARTYR”:** You are deeply inquisitive and ask a lot of questions. The key words for this profile are “research and discovery”. With a 1st line, you’re on a quest to dive deep and learn everything about what interests you. Because you spend so much time uncovering details in your studies, you’re confident to be an expert who can share their knowledge with authority. The 3rd line element to your persona is very different and involves learning through experimentation rather than traditional studies. You need to experience what you learn for yourself. In this respect you are bound to make mistakes in your discovery process. You can’t simply take the word of others, you actually need to feel it and live it. Some famous 1/3 profiles are Pablo Picasso, Princess Diana, Charlie Chaplin, Andy Warhol and Eric Clapton.

**RIGHT ANGLE CROSS OF MAYA 3:** You are here to look for value and consequently ensure survival of the self and the community. You seek value in others as well as material things. Once you find it, you save and store to ensure survival.

## GENE KEYS

**LIFE'S WORK (What you're here to do):** GENE KEY 32: With this Gift as your Life's Work, you need to feel part of a broader pattern. Support from those you trust is one of the great keys in your life. Above all, you need to find what it is that you want to preserve for future generations. If you are raising a family, it is far more important for you to give your children high principles and a feeling of respect for life, than it is to give them financial freedom or economic support. You have a deep and natural instinct for long-term investments, especially in terms of where you put your own energy. If you can expand your horizons to encompass the whole planet, you will find greater fulfilment and, in the long term, greater financial return through the karma you accrue.

**EVOLUTION (What you're here to learn):** GENE KEY 42: With this Gift as your Evolution, you have a challenge in life to finish what you have begun. Not only must you finish what you have begun, but you must finish it cleanly, which means to say that you have to let it go. Endings may be challenging for you, but they are also very beautiful. They give you the opportunity to begin another journey. The trick for you is to make sure that each new beginning has its root in the old ending. In other words, there is great continuity to everything that happens to you in life. The only danger you have is breaking out of patterns too early or hanging on to patterns too long. If you break the pattern too soon, you have to begin all over again with the same pattern until it is finished with you, rather than you thinking that you can finish it! On the other hand, if you hang on to things too long, you break the continuity that leads to the next organic unfolding in your life. The most important thing for you is to let life live through you, and enjoy every experience without trying to exert too much control.

**RADIANCE (What keeps you healthy):** GENE KEY 62: The greatest single undermining feature regarding your health is your mind. If you place too great an emphasis on knowledge, your body will lose its natural intelligence. For you, intelligence is all about your body feeling free. This means that you need room to roam in life. It is more important for your body to move than for your mind to study. Study is important for you, but only for your entertainment – never as a means to an end. It is easy for you to misinterpret your urge to know things. The true urge is to explore things, since this involves the whole of your being, not just your mind. Your urge to know things mentally is really more of a diversion. You are not the kind of person to spend day upon day sitting indoors filling your mind. You are a born communicator. Your only real fulfilment lies in the fact that everything you learn is really for the sake of others, rather than for yourself.

## GENE KEYS (CON'T)

**PURPOSE (What deeply fulfills you):** GENE KEY 61: The purpose of your life is to move beyond all definitions you have of yourself. Life will continually invite you to transcend yourself through the deep inspirations that emerge within you. Every time you feel that you have arrived, life will pull the rug from under your feet again. You are here to learn that all life is change. Behind all this change is something that endures, but it isn't something you can identify with. If you embody this enduring spirit that is essentially based on love and acceptance, you will become an inspiration for many others. You are here to be a light to those who feel bogged down by their own and others' projections of what life is supposed to be. For you, there are no rules or laws – only eternal and joyous change.

## KABBALAH ASTROLOGY

**CHESHVAN (Day 4):** You are born in the early days of Cheshvan which is connected to Scorpio in the Western Zodiac. Scorpio is a water sign and it's ruled by planet Mars and Pluto. Scorpios are emotional and intuitive. They also have strong desire for power and control. They will stay on course to attain their goals at any cost. This gives them unparalleled ambition and determination. Pluto is the planet of transformation and Mars is the planet of the warrior spirit. You are here to fight for what you believe in and undergo major personal growth and change. Scorpios are very extreme and commit tirelessly to their pursuits. In love, they give their all and expect the same of their partners. They can be prone to jealousy and have very high ideals of their loved ones.

**TIKKUN in LEO:** The correction or "Tikkun" in Leo is to assert oneself and be a leader without exercising the use of ego. In this lifetime you will be given the opportunity to lead so long as you do it from a humble place and with the intent to serve humanity. You have been gifted with strength, creativity and originality and will be able to share this with the world to help make it a better place. You must learn to lead from a place of service rather than for any superficial reason.

## VEDIC ASTROLOGY

**VIRGO:** You are naturally communicative, intelligent and grounded. Ruled by Mercury, you pay attention to details and utilize your intellect in practical ways. Be mindful of a tendency to be overly critical of yourself and others. Virgo rules the digestive system, intestines and colon. They are also prone to worry and have nervous tendencies which may affect these organ systems. A meditation and gentle yoga routine can help maintain optimal health.

## TANTRIC NUMEROLOGY

**SOUL NUMBER 5:** The key word for you is balance. If your body is out of tune, you cannot reach a balance in your internal processes. When you are under stress, you have an inability to make sacrifices. This manifests in such a way that you can't push yourself out of your comfort zone to serve others or to serve your own soul. It is a matter of self-discipline versus self-indulgence. Your self-indulgence can easily lead you down a path of self-destruction unless you learn to give up your anger and sacrifice your own comfort. The solution is to accept the fact that you must teach others how to experience their own inner identity. If you connect yourself to your Soul, you will experience your own inner identity, which is that of a teacher. It is through your self-sacrifice that the essence of who you are can be expressed in your life.

**KARMIC NUMBER 10:** In your relationship to your environments and to others you are either all or nothing. There is no in between. This gives you a tendency to be weak in your relationships and business dealings. Your test in this life is to experience and manifest your own radiance in all your work, relationships, and involvements, and to put 150% into everything you do. The solution is to master your Royal projection and live a life of Royal Courage.

**GIFT NUMBER 8:** The key to accepting your GIFT is to connect with your soul. You cannot accept and use your gift unless you feel that you deserve it. Remember, this gift is already yours. Relax, use it and enjoy it. Your gift is fearlessness. This gives you the ability to plan ahead and to help others to get ahead as well. It will enable you to serve many people because it brings with it boundless energy. Your gift will allow you to keep up through every obstacle of life and never quit. If you keep up on a spiritual path in your life, nothing can ever stop you from achieving your goals. The more you work on yourself, the more your gift will manifest.

**DESTINY NUMBER 9:** People tend to see you as competent and masterful in every situation. You find it easy to quickly learn new things because you have worked on mastering things for many lifetimes.

## TANTRIC NUMEROLOGY (CON'T)

**HEART 9:** If sensitivity had a hiding place, it would be in the Heart of Nine. Others should be careful what they say (or even think!) as a Heart of 9 can pick up on everything. A subtle, measured, and patient approach is best here, as they are the custodians of romance. "Slow cook to savor" might be their motto, as they are artisans of creating a lovely mood and environment to enjoy. If you pursue a Heart of Nine, be sure that you are focused on them entirely, as they have a stealth radar that can pick up on any lingering distractions. T

**PATH NUMBER 6:** The path to success and fulfillment in your life is to be a person of prayer. If you practice a spiritual lifestyle and consciously connect to your Soul, then you will always be known as a prayerful, calm, and confident person. Your divine expression is to be a channel that people relate to as a "person at prayer," an authentic human, a holy person, a representative of God. It is through your concentration, one-pointedness, projection, stability, and control that you will find success in your life.

## OVERVIEW

The main recurring themes for you across all astrological modalities are your strong social nature, sense of optimism, diplomacy and wealth of creativity. With a stellium in Libra, a numerological life path of six and your Mayan Seed sign, you have natural gift for networking and bringing people together. People and opportunities naturally flock to you. With a rising sign in Capricorn you are ambitious and hardworking so once you have a goal in mind, you're 100% motivated and focused. You can also fortunately tap into your network to help accelerate your plans in motion. As a Human Design Generator, when you are passionate about a project, you are an unstoppable force. That pure Generator energy coupled with the solid work ethic and determination of a Capricorn ascendant gives you a serious competitive edge and drive to succeed. With your moon in Sagittarius you crave adventure, new experiences, travel and spiritual expansion. In this lifetime, your North Node and Kabbalistic Tikkun (correction) are both in the sign of Leo. Leo is all about courage and standing strong in our true essence. You are destined to be a leader or perhaps someone who is in the spotlight. You have the charm to take center stage and can even be an entertainer if you so choose. With a double Cardinal placement (Libra Sun and Capricorn rising) this reinforces your strong leadership gifts which give you natural sense of authority and ability to direct others. It's worth noting the year of the Monkey is also connected to Leo energy. You're congenial and make a good impression in a crowd. Just be careful of monitoring any potential egoistic tendencies and keeping them in check as this is one of the cautions that can hinder your prosperity.
